

Community Pulse

Description:

Develop a location-aware platform designed to facilitate interaction, visibility, and participation within defined geographic communities.

Features :

- Users can post and browse events. Supported category —> Garage Sales, Sports Matches (local cricket, football, tennis, etc.), Community Classes (yoga sessions, art classes, educational workshops), Volunteer Opportunities (clean-up drives, donation camps), Exhibitions, Small Festivals or Celebrations. Also, the user can edit and delete his/her event.
- Users can mark their interest in attending an event without needing to fill out lengthy forms (only take name, email, phone, and number of people coming with you).
- Notifications (through Email, SMS, or WhatsApp):
 - Reminder 1 day before the event.
 - Live updates if the event changes (e.g., location change or cancellation).

Admin Role

- View, approve, or reject submitted events.
- Flag inappropriate content and remove if needed.
- View event history by user.
- Assign "Verified Organizer" status.
- Ban users if needed.
